

JOB DESCRIPTION IT System Administrator

PayCash Europe S.A. is a young, innovative start-up in the field of mobile/online payment. Our goal is to establish the new standard for payment processes. For the European/worldwide market roll-out, we are looking for creative **IT System Administrator** who is passionate about building products that customers love.

Responsibilities

- Design and develop IT-Infrastructure for our innovative payment solution
- Administration of the PayCash platform (Server, clients, network, firewall)
- Operations management including system monitoring and reporting, defining and monitor quality gates, performance and failure analysis as well as optimization of the platform
- Organizing the user help desk and the technical support
- Soft- and hardware procurement
- Cooperation with external service providers

Requirements

- 4+ years of working experience
- Outstanding knowledge in Linux/Unix OS, Virtualization (Xen), Databases, Networking and Network Security
- Structured problem solver and team player
- English language skills mandatory, German preferred

Our Offer

- Attractive remuneration package
- Exciting and challenging projects in a highly dynamic market environment
- Lead and cooperate with small (3-6 people) developer teams in Luxembourg
- Workplace characterized by low hierarchy and open communication style
- A team looking forward, to share know-how and gain new insights
