

JOB OFFER@

Full Stack Developer

EMPCORP SA – Luxembourg

EMPcorp was founded in 2013 with an innovative acquisition solution and payment platform dedicated to e-merchants. Building on its success and its experience through e-wallet and e-money, the company is now looking for new challenges by diversifying its core business.

The prepaid department is working on the Prepaid Optimal Solutions, POS. The team develops state-of-the-art prepaid cards programs, adapted and customized to each customer's needs and expectations. We are able to control all aspects from the creation to the management and the reporting cards programs developing for our customers.

The POS project is now managed like a startup by a small project management team, but we use EMPcorp resources.

In the framework of its sustainable development and economic growth, we are currently looking for a multi-skilled full stack developer, able to work and build all platform aspects and also to improve together with the management team project processes and structures.

You will work everyday on close partnership with the project team and your creative ideas will be a real added-value for each mission.

EDUCATION

- A computer science degree (minimum a Bachelor's degree)
- Junior profile

EXPERIENCE

- Special interest in the financial field
- Proficient understanding of free languages and technologies (customers/servers)
- Knowledge of languages such as PHP, MySQL and MVC model
- Significant experience with HTML5, CSS3, JS, Bootstrap
- Interest for servers (Apache, Nginx, GNU/Linux) is a plus

ASSET

- You are passionate and self-motivated
- You looking for new challenges
- You like to work in a dynamic team

Do you recognize yourself in the above profile ? Please don't hesitate to send us your complete resume and cover letter at recruitment@empcorp.com
