

SESAMm

Bringing Big Data to the Financial World

NodeJS/Angular2 Developer (m/f) | SESAMm

Our team is looking for a NodeJS/Angular2 Developer.

SESAMm was founded in 2014 and is one of the most dynamic FinTech startups in France and Luxembourg. SESAMm develops and commercializes stock market forecasting tools based on social media and other textual data sources. These products are used by banks and hedge funds. The company provides financial trading indicators which have been created using Big Data methods and allowing new approaches for trading strategies. We develop many new products based on our clients' needs.

SESAMm plans on developing its activity in Europe and Asia by launching very significant R&D and commercial programs.

We have offices in France (R&D) and Luxembourg (Commercial). Our team is young, highly motivated and has several fields of expertise, from computer science to stock market finance.

SESAMm aims at becoming the international leader of Big Data technologies for stock market professionals.
